Summary

Final-year Electronics and Communication Engineering student with a strong interest in robotics, cybersecurity, networking, and antenna design. Passionate about exploring real-world applications through hands-on projects—ranging from autonomous robots and phishing detection systems to cloud labs and antenna simulations. Comfortable working with tools like Raspberry Pi, HFSS, Wireshark, and Linux. Always eager to learn new technologies and gain experience by building things from scratch and solving practical problems.

Education

B.Tech in Electronics & Communication Engineering

Pandit Deendayal Energy University (PDEU) | Expected Graduation: 2026 | CGPA: 6.26

Technical Skills

- Programming & Tools: Python, Embedded C, Bash, Arduino, ANSYS HFSS, Proteus, Tinkercad.
- Cloud & Networking: AWS (EC2, S3, IAM), Docker, Proxmox, VirtualBox, Wireshark, Nmap, DNS Management, Tailscale.
- OS & Debugging: Linux (Ubuntu, Raspbian), System Logs, IPTables, Network Security

Key Projects

- IOT Based Face Recognition Smart Door Lock System | October 2025 - November 2025
- Home Lab Setup & Network Monitoring | August 2025 - November 2025
- Phishing Email Detection System (*Python, TF-IDF, Gmail API*) | November 2023 - April 2024
- AI-Based Chat Threat Analysis (*Python, NLP, AI*) / October 2024 - Present
- Autonomous Object Detection Rover for defense scenario | January 2025 - Present

Certifications

- Wireshark for Network Analysis – Udemy (Jul 2025)
- Cloud Computing – NPTEL (Jan–Apr 2025)
- Signal Processing for Communication – NPTEL (July 2025)

Experience

Summer Research Intern – Department of Electronics & Communication Engineering

Pandit Deendayal Energy University (PDEU) — on Phishing Email Detection | May 2024 – July 2024
